This is a photoalbum of my fifth visit to Popular Republic of China, accomplished in December 2019 mainly with the occasion of The International Conference on Data Intelligence & Neutrosophic Sets with Applications (DI-NSA 2019), held in Xi'an, at the Shaanxi University of Science and Technology. I also lectured at or visited the Xi'an Polytechnic University, the Historical Museum of the Polytechnic University of Xi'an, the Library of Shaanxi University of Science and Technology, Nordwest University of Xi'an, Datang Botanical Garden, Ginwa Plaza, and other places.

A feeling of modern China.

A stance of Xi’an.

View from a side.

Datang Botanical Garden in Xi'an.

Camels in Datang Botanical Garden.

A trained parrot.

Traditional Chinese dance.

Leaves.

Flowers.

The ride.

Towards the conference.

Signing an autograph for Prof. Dr. Jun Ye.

With Dr. Keli Hu from Shaoxing University.

With translator Ling Yang.

Meeting Prof. Dr. Xiaohong Zhang, at the Tang Chan Hotel.

Prof. Dr. Young Bae Jun from South Korea, lecturing at the conference.

School of Arts and Sciences at the Shaanxi University of Science and Technology, Xi'an.

Preparation.

A walk with Prof. Dr. Xin Zhou.

A moment with Prof. Dr. Hu Zhao.

Sharing sensations with the poet Bai Juyi (772 - 846), the author of the long narrative poem "Chang hen ge" ("Song of Everlasting Sorrow").

Streets of Xi’an.

28

Passing by.

Pulse.

Reflections.

An installation for the anniversary of the 70 years since the proclamation of the People's Republic of China.

Ripple.

Reverberation.

Time traveller.

Colors on a tree.

Back in time.

Giant Wild Goose Pagoda.

Christmas spirit.

Chinese Santas.

Lanterns.

Lucent night.

Superlights.

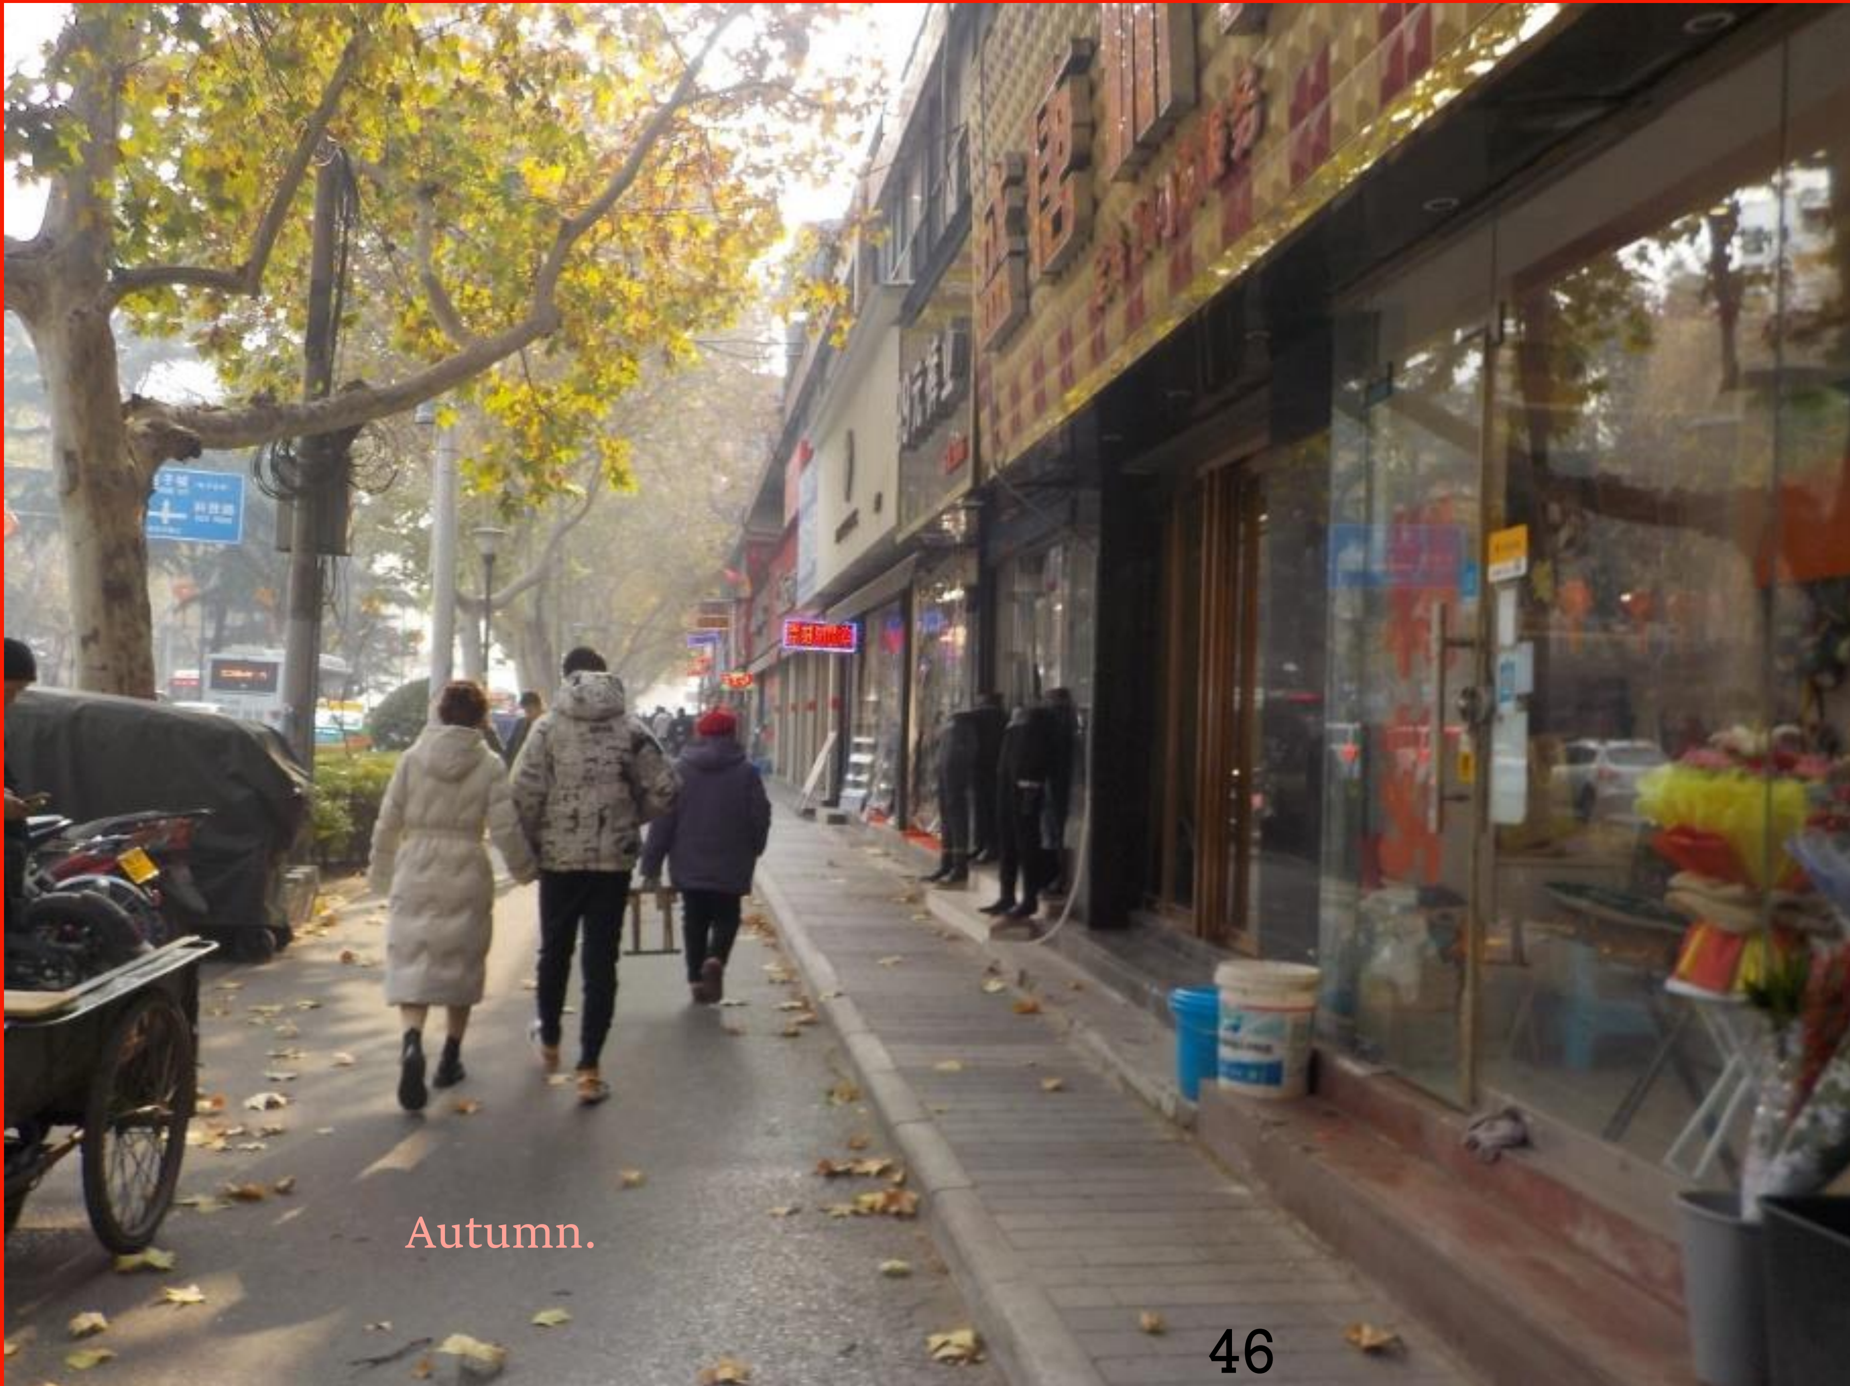

Enjoying Chinese food.

Mild cadence.

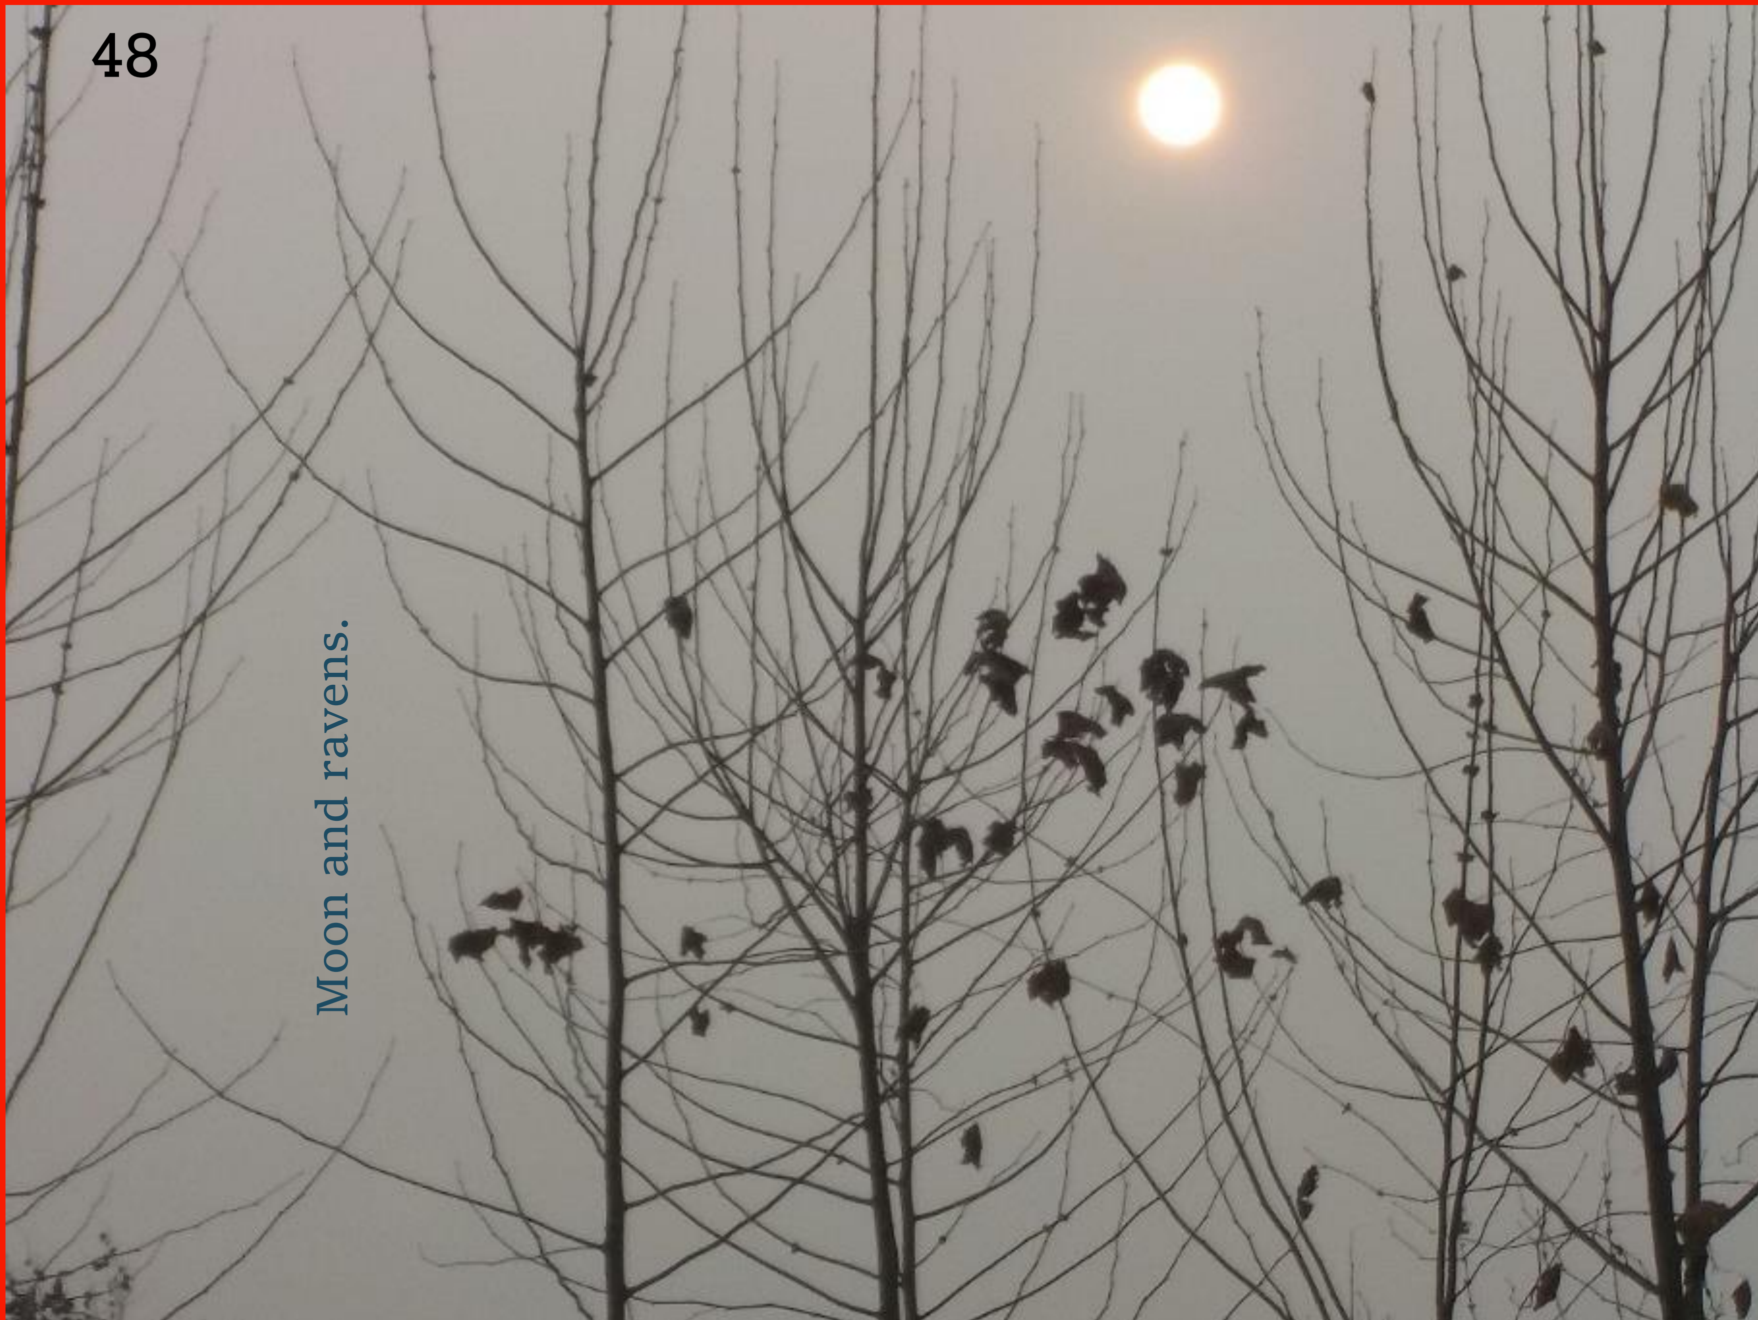

Rhythm.

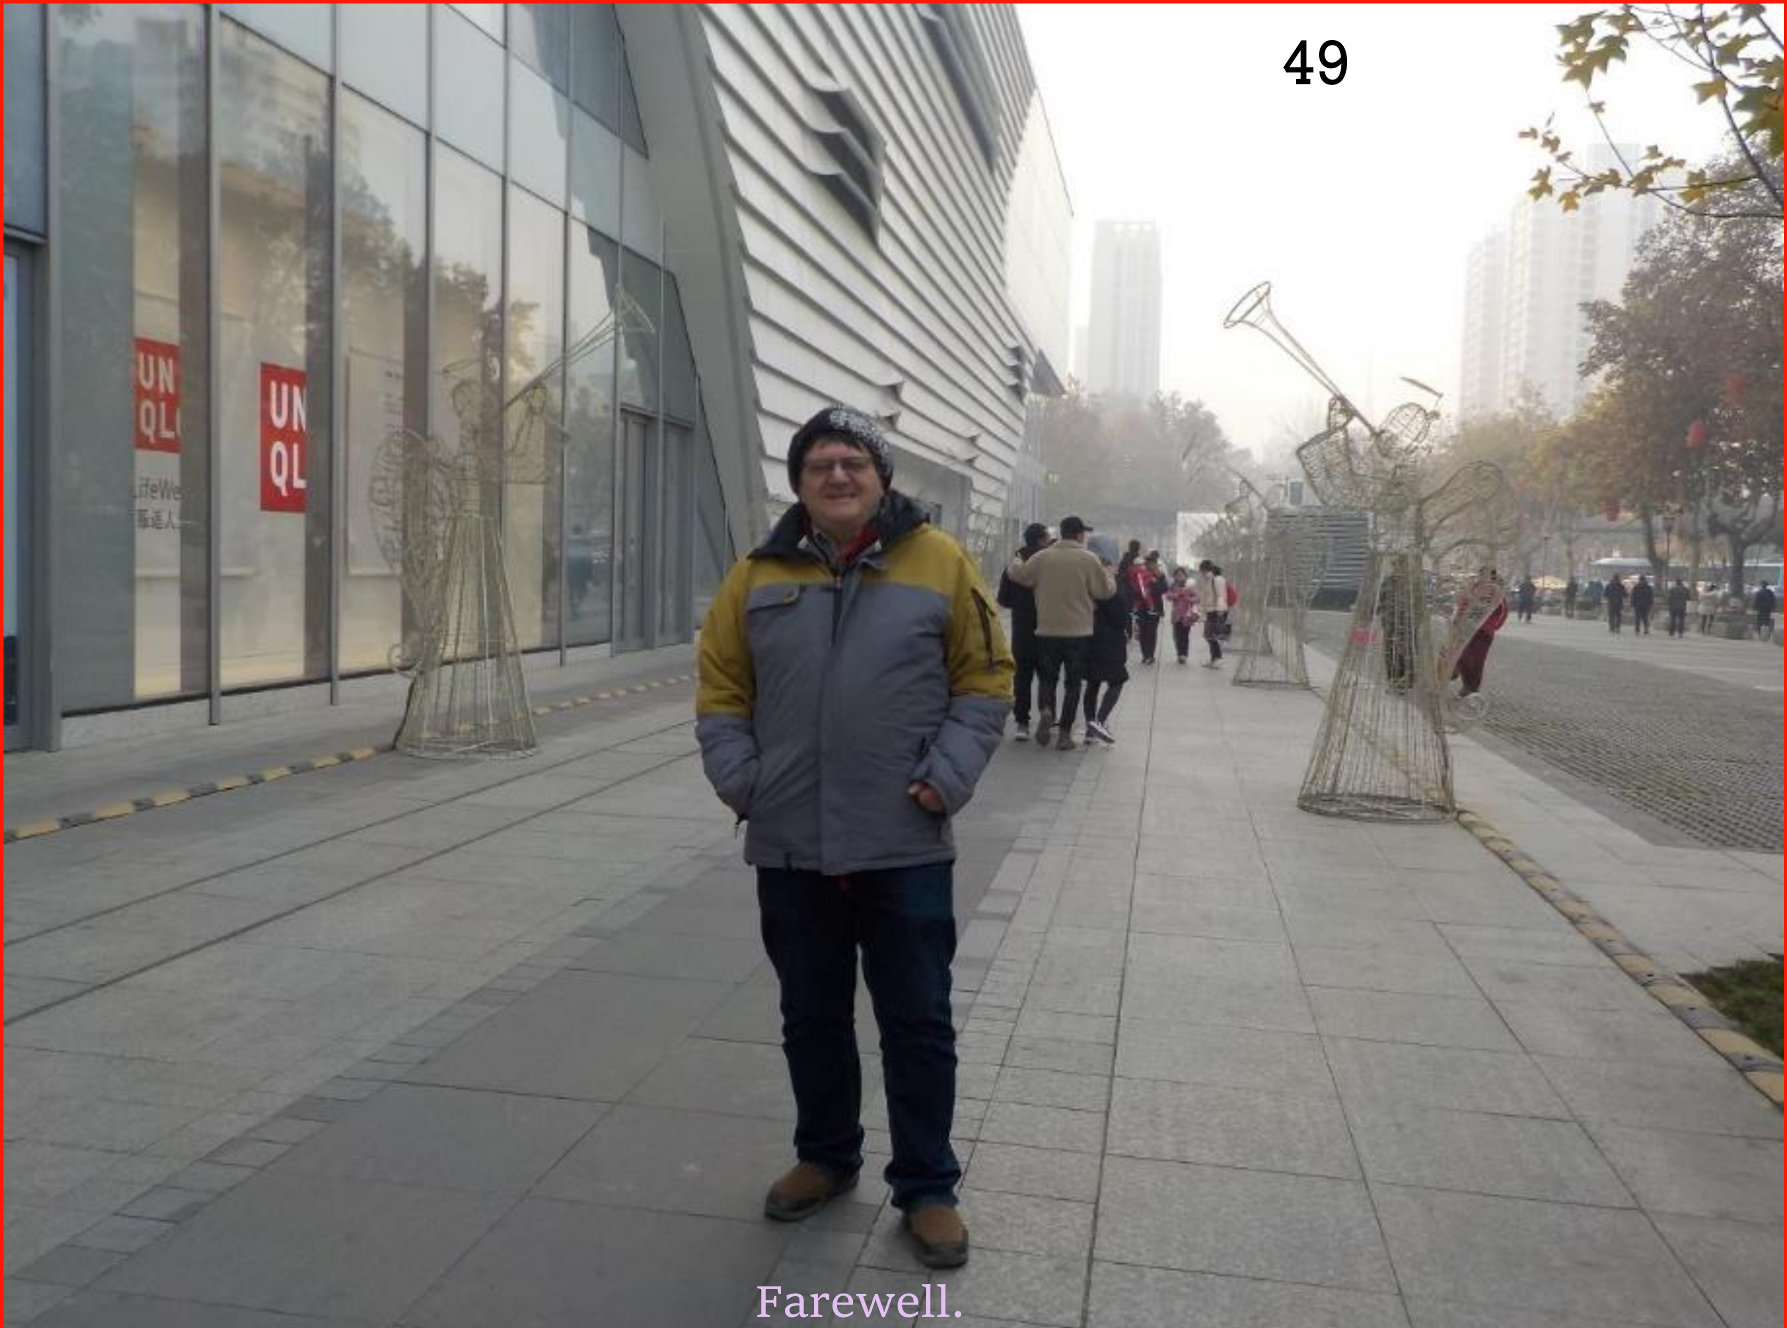

Autumn.

Almost quiet.

Moon and ravens.

Farewell.

Departure.

My Chinese colleagues are proud of their country's achievements, competing with the United States.

In cyberspace, China is the only country that has entered 5G through their Huawei company, and the only one that uses quantum telecommunication.

The dam on the Yangzi River is the largest dam in the world.

The Chinese train is the fastest and most modern in the world, surpassing the Japanese and the French. In 2011, I traveled from Beijing to Xi'an on a very comfortable Chinese train.

And the Shanghai Tower (which I climbed in 2011) is the second tallest in the world, after the one in Dubai.

On the unseen side of the Moon only the Chinese have so far managed to send a spacecraft.

From the military point of view, China is in a fierce competition with the United States, and Russia [the three power-poles of the world], owning 100 military satellites at present and having been able to experience since 2007 the destruction of a satellite with a ground-to-air missile.

In Shenzhen, where I went in 2012, there is a Hi-tech Park with 600,000 programmers, strongly competing with Silicon Valley.
